To all concerned:

I strongly object to the propose building of Townhouses off 196 Ave since it will impact immediately adjacent wetlands mitigation natural ecology, damage the highly fragile Everglades Ecosystem, and overload the already stained infrastructure(waste, traffic, utilities)in our overbuilt area.

PLEASE VOTE NO TO STOP NOW.

Please read my email comments at the August 19, 2020 City Commission meeting.

Best regards

To All Concerned:

I am reaching out to express my very strong objection to the proposed building of townhouses off 196th Avenue, thank you for considering my opinion. This construction will irreparably impact the immediately adjacent wetlands mitigation natural ecology, contribute to the destruction of the fragile Everglades Ecosystem, and increase the stress on the the already overburdened traffic, waste, and utilities infrastructure in West Pines, which is already overbuilt and chaotic.

PLEASE VOTE "NO" TO STOP THIS NOW

Please read my email comments at the August 19, 2020 City commission Meeting.

I appreciate your consideration, and I am grateful for your help and attentiveness to this matter.

All the best,
Elena Meadows

Caution! This message was sent from outside your organization.

[Allow sender](#) | [Block sender](#)

To All Concerned:

I am grateful for you taking the time to open and read my email; I want to let the Commission know of my very strong objection to allowing a developer to build townhouses off 196th Avenue since doing this will contribute to the irreparable destruction of the wetlands mitigation natural ecology, have a permanent negative impact on the highly fragile Everglades Ecosystem, and overload the already strained infrastructure (traffic, waste, utilities) in the already out of control and crowded West Pines area.

PLEASE VOTE "NO" TO STOP THIS NOW

Please read my email comments at the August 19, 2020 City commission Meeting.

I appreciate your consideration, and I thank you for getting my opinion heard on this matter.

Sincerely,
Madeline Meadows

Subject: 196th & Pines = Compensable Regulatory Taking

To Whom owns controlling votes:

Building up a city or town is a natural progression, but when that land is already zoned and then changed solely for the monetary gain of developers and those that associates and with whom exercise votes over such a matter is an entirely different matter.

Moving up from Dade county fifteen years ago to escape the out-of-control urban scrawl, my wife and I chose this property over tens of others solely due to the fact that our property backs a natural sub-tropical habitat. That habitat contains bald eagles, Everglades deer and the highly endangered Wood Stork, to name a few.

This re-zoning appears for no other purpose than somebody else's commercial and personal financial gain. This directly and negatively affects our existing home values. Without any argument to suggest a case of Eminent Domain, this clearly constitutes a compensable regulatory taking under Florida law. I can only speak for my own home value, but in our case this constitutes a direct taking upwards of \$100K out of our pockets, which in the absence of any contrary reason, is unacceptable, and will not be taken without contest.

Regards,

Mark & Heather Krasnow

To:

- Mayor Frank Ortis,
- Commissioner Larissa Chanzas,
- Commissioner Jay Schwartz,
- Commissioner Thomas Good,
- Commissioner Iris Siple

Please read my e-mail comments at the August 19, 2020 city commission meeting.

Dear Mayor and Commisssieners,

I own and live at 456 SW 191st Terrace since 2009.

I strongly object to the proposed building of townhouses of 196th Avenue since it will impact the immediately adjacent wetlands mitigation natural ecology, damage the highly fragile Everglades Ecosystem, and overload the already stained infrastructure (traffic, waste, utilities) in our overbuilt area.

This area we live is overbuilt and we already have to deal with the negative resulsts of that. Therefore, I urge you all not to make the mistake to authorize the building of more townhouses in this area!

The future of our families are very important, I hope that you make the right decision to vote againsts and reject this proposal to build more townhouses in the area.

My best regards to you all.

Roberto Moreno

Subject: Proposed Encantada-Estancia Townhomes ...

Importance: High

Caution! This message was sent from outside your organization.

[Allow sender](#) | [Block sender](#)

Greetings:

I am writing to express my deep concern regarding the proposed townhome development behind Encantada-Estancia, southeast of Pines Boulevard and 196th Avenue.

Development continues to infringe and encroach on native wildlife in the area. Indeed, when the Chapel Grove development was built, it removed a significant source of food (egrets) for the nesting bald eagles at Pines Boulevard and 208th Avenue; in addition, numerous deer, bobcats, etc. are being marginalized and forced to the fringe in what was once plentiful habitat.

Furthermore, SW 196th Avenue is already highly congested morning and afternoon with the additional traffic resulting from Somerset Academy Elementary (before the pandemic, and when face-to-face instruction resumes), and there is still no traffic relief from a proposed extension of Pembroke Road to U.S. 27, as well as an extension of SW 208th Avenue to Pembroke Road; this construction will simply bring that much more traffic that will have to fit into the existing, limited traffic flow.

I urge the commission to reject this proposal, with an eye on purchasing the land in order to conserve the way of life those who settled out this way envisioned for years to come; the fragility of the ecosystem is at grave risk, something we can ill afford in these uncertain and dangerous times.

Most Sincerely,

Chris Cappannelli, Ed.D.

To all concerned:

I strongly object to the proposed building of townhouses on 196th Ave. in Pembroke Pines. Please VOTE "NO" to STOP this NOW!

My family and I are strongly opposed to the proposed townhomes, which will severely impact the immediate adjacent wetland mitigation natural ecology. We cherish and respect our adjacent fragile wetlands and wildlife preserve each and everyday we live here in Estancia. This preserved land is why we bought our home here. This area's fragile Everglades Ecosystem must remain undisturbed without further development on the proposed land tract. The area's wildlife is already stressed because of other recent over development of our precious and limited wild and community open spaces. The proposed townhome building will make an irreversible negative impact to all of us around the Encantada/Estancia Preserve! Lastly, the Pembroke Pines western suburb infrastructure is also already stressed from over building with traffic and congestion. So again, please vote "NO" to stop!

Please read my e-mail comments at the August 19, 2020 City Commission meeting. Thank you.

Respectfully,

Mark Mueller

Please stop the proposal to build more townhouses the area adjacent to Encantada and 196ave. Considering the high density of people and houseS already packed into this area... residents and the Everglades need to preserve This area with fresh air local flora and fauna. More building would overcrowd the area and precious wildlife . We need to preserve our quality of life . We do not need further strain on our highways, schools, garbage and Water supply, Not too mention safety.

I am against this plan to destroy our quality of life . We do not need any more development. We are too crowded as it is, thank you,

Sincerely,

Mary Stephens

Dear Sir,

I am very concerned and strongly object of the re-zoning you have done and the plans to build more townhouses on 196th Avenue in Pembroke Pines. This is a Preserve and was promised not to be built upon. We do not want or need more homes to further congest the area. With all our schools over crowded and traffic, this is not a wise decision. School traffic in West Pines is awful. You cannot get in or out many developments because of this. It also causes more strain on the utilities. We have lost our small herd of deer because of all the development. We do not need more. This is not NYC. We do not want more congestion.

PLEASE VOTE NO TO STOP THIS NOW AND IN THE FUTURE!

Thank you,

Subject: Stop Proposed Townhouse Development on SW 196th Avenue

Good morning,

I'm writing this as a concerned citizen of West Pembroke Pines. I am strongly objected to the proposed development on SW 196th Avenue. The overdevelopment of Pembroke Pines becomes more evident every day as traffic and quality of life becomes worse. There has already been a school built in that area that caused large backups while it was in session. Another concern I have is environmental, this area has fragile wetlands that are home to species that are locally endangered such as the snail kite, American alligators which I have personally seen there, development of this would cause harm to those species as well as the Everglades ecosystem as a whole. As citizens have already seen, the city has no regard for the environment or aesthetic of this area's natural beauty, given the amount of developments in the last few years on ever smaller plots of wetland. The reason I moved to west Pines was to live in a quiet area with less traffic and to be closer to nature and the Everglades. I happily pay for the higher property values because of the natural aesthetic, less traffic and less noise that comes with it. However, given the record this city has of unfettered development, I'm not sure how much longer the quality of life here will be worth the cost and ever-growing commute times. The infrastructure here is already strained, and in the few years I've lived here, I've seen several residential, commercial developments and a school built west of 184th, making traffic and noise notably much worse. The allure of west Pines (and it's higher property values) is becoming no longer worth it to me, when I can be closer to work and get more value for money in neighboring, built-out cities, which traffic and noise will be comparable to if development keeps up at the rate it's going.

Please vote "NO" to stop this development. Give the people a voice for once rather than the developer. Show your constituents you care about the environment and their quality of life in the city, rather than trying to squeeze every square foot of vacant land for property tax dollars. Our votes get you elected, not property tax dollar promises from developers.

Please read my e-mail comments at the August 19th, 2020 City Commission Meeting.

Subject: New building

I am writing to voice my discontent at the prospect of having town homes being built across from my home on the wetland.

When I bought my property, I was assured that at no time would there be any homes built across the canal into the wetland. I was told it was protected land. I also believe it is a Native American sacred ground as I have heard chanting on many occasions.

Enough already. Why must we lose all the beautiful land and trees for the sake of greed.

NO MORE.

Thank you

Ruth Kalinsky

Please read my e-mail comments at the August 19, 2020 City Commission meeting.

When is it going to stop? The few unbuilt parcels of land left in West Pembroke Pines that were preserves need to stay that way. Areas left undeveloped for the preservation of natural beauty and wild life. Now you want to allow development on one of the last few remaining acres we treasured almost 30 ago.

We move here because of the beauty of West Pembroke Pines, preserve land, better schools and less traffic. In 2.5 yrs I have seen this beautiful city(Chapel Trail) change for the worst!

It is a disgrace what this city government has allowed to occur out here. Zone, rezone, build, rezone again, build higher density. It a travesty not only to the little remaining wildlife but to the few remaining original West Pembroke Pines pioneers.

Our infrastructure here in Pembroke Pines is already at the brink of failure, in fact, part of it has already failed. Sadly, a few years ago the water system was under federal scrutiny for toxic chemicals in the government mandated water tests. And it continues being pushed to its max. We have water pressure issues, chlorination issues, toxicity issues, do we really need more building? More homes will add to traffic issues which are already being impacted by the lack of policing since Covid-19. Try driving down Pines Blvd today and not get run over by someone passing you at 80 miles an hour. Imagine what will happen with more people living here.

Construction and the addition of these homes so close to the Everglades will have a negative impact on that precious resource as well. The Everglades has been suffering for years from out of

control building, water runoff, pollution. What about the additional Garbage and sewage. We already can't rely on the city's contractors ability to keep up with collection. Sometimes we have to wait days or even a week to have our garbage or bulk trash picked up.

I have heard over and over from this City commission that this continued growth is for the benefit of the city as a whole. Baloney. This is not about keeping Pembroke Pines the city we have come to be proud of, this is strictly about lining the pockets of those that can be enriched the most regardless of the impact. You Mayor Ortiz and Commisioners are RESPONSABLE for this acts, you will be accountable to not be re-elected by your people if THiS continous building continues.

I am AGAINTS any further building in West Pembroke Pines. Specially where previously designated no build land can have the zoning changed for the benefit of the developers. When is this carnage going to stop?

i hope you make a good decision by stoping this TODAY!!!

To all concerned:

I strongly object to the proposed building of townhouses off 196th Avenue since it will impact the immediately adjacent wetlands mitigation natural ecology, damage the highly fragile Everglades Ecosystem and overload the already strained infrastructure (traffic, waste, utilities) in our overbuilt area. I personally have seen deer, eagles and other animals in that area and they will surely be negatively impacted by this project.

PLEASE VOTE "NO" TO STOP THIS NOW and make the right choice for the environment and for all the current residents.

Please read my e-mail comments at the August 19, 2020 City Commission meeting.

Sincerely,

Ailyn Gonzalez

PLEASE VOTE "NO" TO STOP THIS NOW."

Please read my e-mail comments at the August 19, 2020 City Commission meeting.

When is it going to stop? The few unbuilt parcels of land left in West Pembroke Pines that were preserves need to stay that way. Areas left undeveloped for the preservation of natural beauty and wild life. Now you want to allow development on one of the last few remaining acres we treasured almost 30 ago.

We move here because of the beauty of West Pembroke Pines, preserve land, better schools and less traffic. In 2.5 yrs I have seen this beautiful city(Chapel Trail) change for the worst!

It is a disgrace what this city government has allowed to occur out here. Zone, rezone, build, rezone again, build higher density. It a travesty not only to the little remaining wildlife but to the few remaining original West Pembroke Pines pioneers.

Our infrastructure here in Pembroke Pines is already at the brink of failure, in fact, part of it has already failed. Sadly, a few years ago the water system was under federal scrutiny for toxic chemicals in the government mandated water tests. And it continues being pushed to its max. We have water pressure issues, chlorination issues, toxicity issues, do we really need more building? More homes will add to traffic issues which are already being impacted by the lack of policing since Covid-19. Try driving down Pines Blvd today and not get run over by someone passing you at 80 miles an hour. Imagine what will happen with more people living here.

Construction and the addition of these homes so close to the Everglades will have a negative impact on that precious resource as well. The Everglades has been suffering for years from out of control building, water runoff, pollution. What about the additional Garbage and sewage. We already can't rely on the city's contractors ability to keep up with collection. Sometimes we have to wait days or even a week to have our garbage or bulk trash picked up.

I have heard over and over from this City commission that this continued growth is for the benefit of the city as a whole. Baloney. This is not about keeping Pembroke Pines the city we have come to be proud of, this is strictly about lining the pockets of those that can be enriched the most regardless of the impact. You Mayor Ortiz and Commisioners are RESPONSABLE for this acts, you will be accountable to not be re-elected by your people if THiS continous building continues.

I am AGAINST any further building in West Pembroke Pines. Specially where previously designated no build land can have the zoning changed for the benefit of the developers. When is this carnage going to stop?

i hope you make a good decision by stoping this TODAY!!!

To Whom It May Concern:

I strongly object to the building of any more townhomes on 196th Avenue in Pembroke Pines. I have been a resident of Pembroke Pines and have lived in Encantada since 2004 and have seen the poor wild life driven away from their homes. You are destroying our ecosystem and their home for townhouses we don't need.

I ask you to strongly consider doing the right thing for our environment.

Thank you,
Nora Delgado

We would like to voice our concern and express our ***strong*** objection to the proposed building of townhomes off 196th Avenue since it will impact the immediately adjacent wetlands mitigation natural ecology, damage the highly fragile Everglades Ecosystem, overload the already strained infrastructure (traffic, waste, utilities) in our overbuilt area. **PLEASE VOTE "NO" TO STOP THIS NOW!!!**

We have lived in Encantada in Pembroke Pines for the past twenty years and have watched our city grow and prosper. The proposed townhomes; however, will cause environmental destruction of our very unique preserve. There is no other similar preserve in our city! We love and enjoy the wildlife that live in the preserve and that on occasion make their way onto our backyards. It will also negatively impact our home values. So, please consider your decision carefully and vote "no" for the future of our city.

Please read our email comments at the August 19, 2020, City Commission meeting.

Subject: Stop construction at 196th Avenue! No to Borluv Project.

To whom it may concern.

I'm writing to add my name to the long list of residents opposing the Borluv project. NO to construction in the preserve. I'm amazed that the city would consider building anything IN the Estancia -Encantada preserve. There's absolutely no positives in such a decision, you'll allow the destruction of a unique wildlife area, destroy property values of very attractive areas that have great future potential as most attractive to live in. And the link to the Everglades can never be restored. Also, have you considered the current potential for failure of the project in this post COVID environment.

I know that we're late to the game as all the postings really are set to work against the tax paying homeowner, but we elect officials to protect our interest..and voting for this 196th Avenue project is clearly adversarial to homeowners of Encantada, Estancia and Pembroke Pines. Thank You.

Caution! This message was sent from outside your organization.

[Allow sender](#) | [Block sender](#)

City of Pembroke Pines Leadership,

As a resident of the Encantada Community, I want it to be known that my family and I do not want condos to be built between our community and the Estancia community, where there is currently a small wetland area (SW 196th). I feel that it is not necessary for our city to develop all of its green areas. This wetland area is the home to a variety of wildlife; a family of deer, bobcat, the occasional alligator, raccoons, squirrels, and a variety of snakes and birds. I have observed these animals from my backyard. It would be a shame to begin the development process to add more condos, when there is a condo development currently in construction on Pines Blvd less than 2 miles away. Please leave the wetlands areas alone, we have a delicate balance here in South Florida and once it's gone, it's gone.

Respectfully,

Michael K. Byard

Subject: Development west pined off 196 between Estancia & Ecantada

I'm writing this so you hear my concerns as a resident of west Pembroke Pines. I live in Estancia on the water across from the proposed land that is up for discussion on development. When I bought my home in 2009

I inquired prior to purchasing it and was told by my Real estate agent and prior homeowner that the preserve behind my home would not be built on. That is the only reason I bought my home here in West Pines in Estancia as I settled on a smaller home and wanted one specifically without homes across the lake. The area is a very small preserve and buffer between the two existing developments. You're already on top of each other in our neighborhood and prone to flooding out here when we have the bad rains that span over a couple of days as it is my yard gets flooded from the lake as well does that preserve back there. Building on top of that is a concern because where is the water going to go. Second that's a natural habitat for many deers which I watch daily frolicking back in that area as well as the birds and other creatures. That's an extremely small plot of land to put townhomes in which will disrupt our quality of life in our adjoining neighborhoods. West Pembroke Pines roads are already overcrowded with traffic and this is becoming like Hialeah which is not a place I want to live. I'm very concerned about my property value as well with cheap development now crammed into the small plot of land between the two developments. Another concern is noise pollution if you put a development and this area another reason why I live here is for the piece of quiet. I already hear the neighbors in Encantada across the water I can't imagine if a development of townhomes is on top of us. I'm begging the commission to not approve zoning changes to then building townhomes in this land. Instead of working for big business think of the citizens in west Pembroke Pines and don't approve this. You don't live in the impacted communities but vote like you do.

Subject: Lennar development (protect our green land)

Caution! This message was sent from outside your organization.

[Allow sender](#) | [Block sender](#)

My understanding is that once they get the zoning change, they are going to flip the land for a profit to Lennar to build another high density community with more traffic. The developer is the son of former Doral Mayor Luigi Boria who gave his kids millions of dollars to buy properties everywhere and flip the land simply for profit, he was recently investigated for ethics violations pertaining to this relationship. We don't need these kind of out of town, for-profit only developers to shove as many homesites onto a small piece of land for their own personal gain and simply walk away. Our communities will have to deal with the consequences of these high density developments for years to come. Ironically the day before this vote, Aug. 18 is a special election for District 4 commissioner, let's see how the candidates will deal with this situation because the very next day, this agenda item will be presented to the Commission.

I don't really think Pembroke Pines Commisioners wont be elected again because of this. I hope you understand all the community in the surroundy area is agains this development. Better to build a park or even better protect our green areas. My vote for sure will be AGAINTS the ones that vote yes to changing the zonning for this to happen.

Thanks for taking my letter into consideration.

Please read these comments at the August 19, 2020 City Commission meeting.

To all concerned:

I strongly object to the proposed building of townhouses off 196th Avenue since it will impact the immediately adjacent wetlands mitigation natural ecology, damage the highly fragile Everglades Ecosystem, and overload the already stained infrastructure (traffic, waste, utilities) in our overbuilt area. PLEASE VOTE "NO" TO STOP THIS NOW.

I have spoken to the Commission previously about the general destruction of green lands in Pembroke Pines. You can take a stand here to voice your support for Pembroke Pines as a protector of the unique Everglades ecology, and maintaining a community where the quality of life is more important than endless exploitation through undesired development.

PUT A STOP TO THIS DEVELOPMENT NOW AS A COMMITMENT TO PEMBROKE PINES' GREEN PLAN (<https://www.ppines.com/DocumentCenter/View/2656/greenplan?bidId=>), which states that "Currently Pembroke Pines and the South Florida region face challenges that have the potential to decrease the quality of life, environmental assets and degrade the built environment – these challenges have the capacity to diminish resources and add further strains on the environment and existing infrastructures. The City is currently at a crossroad, as the City nears build out and the need for redevelopment looms, the crossroad will present itself in two routes. One route to choose will be "business as usual." This road will lead to diminishing resources such as land, water, wildlife, housing, jobs and educational opportunities. The other route to choose is one that would anticipate and plan for the future to assist in ensuring resources for our future citizens."

Three of you were instrumental in creating this document - your name is on it.
Now you can foster a culture of environmental stewardship. You said, "With increasing environmental threats to the region, depletion of natural resources, regional build out, population increases and the growing demand on our natural environment, it is the responsibility of local governments and the citizenry to ensure decisions today are resilient enough to withstand the test of time. Once this parcel of land is destroyed, it will be forever. And it will negatively impact the water and land in the preserve and adjacent communities.
There is too much stress now - traffic, pollution, water quality, natural habitats for native flora and fauna.

How can you replant native trees around the city on one hand, and be responsible for removal of so many indigenous trees in this small parcel of land on the other? Leave the natural environment alone.
**PLEASE HONOR YOUR COMMITMENT TO THE GREEN PLAN, YOUR/OUR COMMUNITY,
AND YOUR/OUR ENVIRONMENT.
VOTE 'NO' NOW.**
Thank you.

Please read these comments at the August 19, 2020 City Commission meeting.

To all concerned:

I strongly object to the proposed building of townhouses off 196th Avenue since it will impact the immediately adjacent wetlands mitigation natural ecology, damage the highly fragile Everglades Ecosystem, and overload the already stained infrastructure (traffic, waste, utilities) in our overbuilt area. PLEASE VOTE "NO" TO STOP THIS NOW.

I have spoken to the Commission previously about the general destruction of green lands in Pembroke Pines. You can take a stand here to voice your support for Pembroke Pines as a protector of the unique Everglades ecology, and maintaining a community where the quality of life is more important than endless exploitation through undesired development.

PUT A STOP TO THIS DEVELOPMENT NOW AS A COMMITMENT TO PEMBROKE PINES' GREEN PLAN (<https://www.ppines.com/DocumentCenter/View/2656/greenplan?bidId=>), which states that "Currently Pembroke Pines and the South Florida region face challenges that have the potential to decrease the quality of life, environmental assets and degrade the built environment – these challenges have the capacity to diminish resources and add further strains on the environment and existing infrastructures. The City is currently at a crossroad, as the City nears build out and the need for redevelopment looms, the crossroad will present itself in two routes. One route to choose will be "business as usual." This road will lead to diminishing resources such as land, water, wildlife, housing, jobs and educational opportunities. The other route to choose is one that would anticipate and plan for the future to assist in ensuring resources for our future citizens."

We moved here over 26 years ago and purchased a home in the Estancia development because the development was adjacent to a mitigation/protected area. Now you propose to destroy that? Unacceptable and ridiculous. It's bad enough that we now have 70+ townhomes at the entrance of our development(Estancia) that look terrible not to mention the additional traffic, noise, waste, etc. Where will this end ?? When you remove all the protected areas and completely destroy our property values?

To the Pembroke Pines Mayor and City Commissioners:

I am writing to strongly express my objection to the building of 48 immediate and up to 48+ additional Townhomes on a narrow piece of land located directly between the Encantada and Estancia communities in West Pembroke Pines that is currently under consideration.

- MORE IMPORTANTLY this land abuts directly to (not nearby but immediately against) the current PROTECTED Wetland Mitigation Area between these two communities, and fronts on 196th Avenue. This Mitigation area was established to protect our environment and this project will only hurt it.
- Removal of the current trees to build homes will damage/destroy the valued and protected Wetlands Mitigation area and it will greatly impact the wildlife who live in that area - it is their home.
- Further, it will overload an already overloaded infrastructure (traffic, sewage, water, utilities) in the area.
- And last, if approved, it WILL VIOLATE the Green Plan developed by the City of Pembroke Pines - *three of the current Commissioners/Mayor signed onto the Green plan so I don't need to recount why this green plan would be violated - you know why.*
- Somehow this Green Plan was apparently overlooked when, as I understand it, the land was reclassified from Agriculture to a class that allows homes/Townhomes to be built on this land, in spite of its location and adjacencies. I wonder why?
- If you are not familiar with the area, please come take a look and you will clearly understand firsthand why this land should NOT be built upon. *Or simply look at a map of the area and it will be obvious how this will damage/destroy the natural ecology and fragile ecosystem of the area.*

Please listen to your constituents and VOTE NO to building on this unique, precious and valued green space.

And PLEASE read my comments at City Commissioner meeting when this issue is on the agenda and being discussed. Thank you.

I strongly object to the proposed building of townhouses off 196th Avenue.

- 1) It will impact the immediately adjacent wetlands mitigation natural ecology as well as damage the highly fragile Everglades Ecosystem. Deer, foxes, bobcats, birds still use these wetlands as sanctuary and we have already seen the damage made by the construction sites next to Estancia, as well as next to St Edwards Catholic Church.
- 2) It will overload the already stained infrastructure (traffic, waste, utilities) in our overbuilt area. Schools are bursting with students, way too many per class. Traffic is absolutely terrible. Again, we can see the impact the two construction sites previously mentioned have caused on traffic on Pines Blvd west of 184th. On top of that Pembroke Road-196th Street was opened to help minimize traffic on Pines Blvd and Miramar Pkwy and is a two-way street which has become a nightmare and will be even more so with the Proposed Development exiting on 196th.
- 3) Besides that, the proposed multi-story townhomes which will be a big eyesore smack dab in the middle of our single-family home communities.
- 4) And bottom line, I vote that there is a moratorium on all construction west of I-75 period.

PLEASE VOTE "NO" TO STOP THIS NOW.

We moved here over 26 years ago and purchased a home in the Estancia development because the development was adjacent to a mitigation/protected area. Now you propose to destroy that? Unacceptable and ridiculous. It's bad enough that we now have 70+ townhomes at the entrance of our development(Estancia) that look terrible not to mention the additional traffic, noise, waste, etc. Where will this end ?? When you remove all the protected areas and completely destroy our property values?

To the Pembroke Pines Mayor and City Commissioners:

I am writing to strongly express my objection to the building of 48 immediate and up to 48+ additional Townhomes on a narrow piece of land located directly between the Encantada and Estancia communities in West Pembroke Pines that is currently under consideration.

- MORE IMPORTANTLY this land abuts directly to (not nearby but immediately against) the current PROTECTED Wetland Mitigation Area between these two communities, and fronts on 196th Avenue. This Mitigation area was established to protect our environment and this project will only hurt it.
- Removal of the current trees to build homes will damage/destroy the valued and protected Wetlands Mitigation area and it will greatly impact the wildlife who live in that area - it is their home.
- Further, it will overload an already overloaded infrastructure (traffic, sewage, water, utilities) in the area.
- And last, if approved, it WILL VIOLATE the Green Plan developed by the City of Pembroke Pines - *three of the current Commissioners/Mayor signed onto the Green plan so I don't need to recount why this green plan would be violated - you know why.*
- Somehow this Green Plan was apparently overlooked when, as I understand it, the land was reclassified from Agriculture to a class that allows homes/Townhomes to be built on this land, in spite of its location and adjacencies. I wonder why?
- If you are not familiar with the area, please come take a look and you will clearly understand firsthand why this land should NOT be built upon. *Or simply look at a map of the area and it will be obvious how this will damage/destroy the natural ecology and fragile ecosystem of the area.*

Please listen to your constituents and VOTE NO to building on this unique, precious and valued green space.

And PLEASE read my comments at City Commissioner meeting when this issue is on the agenda and being discussed. Thank you.

Please read these comments at the August 19, 2020 City Commission meeting.

To all concerned:

I strongly object to the proposed building of townhouses off 196th Avenue since it will impact the immediately adjacent wetlands mitigation natural ecology, damage the highly fragile Everglades Ecosystem, and overload the already stained infrastructure (traffic, waste, utilities) in our overbuilt area.

PLEASE VOTE "NO" TO STOP THIS NOW.

I have spoken to the Commission previously about the general destruction of green lands in Pembroke Pines. You can take a stand here to voice your support for Pembroke Pines as a protector of the unique Everglades ecology, and maintaining a community where the quality of life is more important than endless exploitation through undesired development.

PUT A STOP TO THIS DEVELOPMENT NOW AS A COMMITMENT TO PEMBROKE PINES' GREEN PLAN (<https://www.ppines.com/DocumentCenter/View/2656/greenplan?bidId=>), which states that "Currently Pembroke Pines and the South Florida region face challenges that have the potential to decrease the quality of life, environmental assets and degrade the built environment – these challenges have the capacity to diminish resources and add further strains on the environment and existing infrastructures. The City is currently at a crossroad, as the City nears build out and the need for redevelopment looms, the crossroad will present itself in two routes. One route to choose will be "business as usual." This road will lead to diminishing resources such as land, water, wildlife, housing, jobs and educational opportunities. The other route to choose is one that would anticipate and plan for the future to assist in ensuring resources for our future citizens."

Three of you were instrumental in creating this document - your name is on it.

Now you can foster a culture of environmental stewardship. You said, "With increasing environmental threats to the region, depletion of natural resources, regional build out, population increases and the growing demand on our natural environment, it is the responsibility of local governments and the citizenry to ensure decisions today are resilient enough to withstand the test of time. Once this parcel of

land is destroyed, it will be forever. And it will negatively impact the water and land in the preserve and adjacent communities.

There is too much stress now - traffic, pollution, water quality, natural habitats for native flora and fauna - PLEASE HONOR YOUR COMMITMENT TO THE GREEN PLAN, YOUR COMMUNITY, AND

YOUR ENVIRONMENT.

VOTE "NO" NOW.

Thank you.

Please read my e-mail comments at the August 19, 2020 City Commission meeting.

I strongly object to the proposed building of townhouses off 196th Avenue.

- 1) It will impact the immediately adjacent wetlands mitigation natural ecology as well as damage the highly fragile Everglades Ecosystem. Deer, foxes, bobcats, birds still use these wetlands as sanctuary and we have already seen the damage made by the construction sites next to Estancia, as well as next to St Edwards Catholic Church.
- 2) It will overload the already stained infrastructure (traffic, waste, utilities) in our overbuilt area. Schools are bursting with students, way too many per class. Traffic is absolutely terrible. Again, we can see the impact the two construction sites previously mentioned have caused on traffic on Pines Blvd west of 184th. On top of that Pembroke Road-196th Street was opened to help minimize traffic on Pines Blvd and Miramar Pkwy and is a two-way street which has become a nightmare and will be even more so with the Proposed Development exiting on 196th.
- 3) Besides that, the proposed multi-story townhomes which will be a big eyesore smack dab in the middle of our single-family home communities.
- 4) And bottom line, I vote that there is a moratorium on all construction west of I-75 period.

PLEASE VOTE "NO" TO STOP THIS NOW.

Sincerely,

Lourdes I. Crohare and family

Please read my comments
at the aug 19 City commission meeting

Please stop the proposal to build more townhouses the area adjacent to Encantada and 196ave. Considering the high density of people and houseS already packed into this area... residents and the Everglades need to preserve This area with fresh air local flora and fauna. More building would overcrowd the area and precious wildlife . We need to preserve our quality of life . We do not need further strain on our highways, schools, garbage and Water supply, Not too mention safety.

I am against this plan to destroy our quality of life . We do not need any more development. We are too crowded as it is, thank you,

Sincerely,

Mary Stephens

No more TOWNHOUSES and the destruction of the Ecosystem.

Please do not change the zoning from Agriculture to Residential. Keeping the Zone the as Agriculture has been saving the Everglades, the reduction of traffic and dangerous accidents that leads to people dieing.

NO MORE TOWNHOUSES!!!

Estancia Resident
