Good afternoon,

We are happy to inform you that our funding for federal fiscal year 2021 have been reactivated. We would like to know if your agency is still in need of the funding. If so, we will have to work closely to review your original request as due to the supply chain issues prices have been affected.

As you might recall, due to the COVID-19 pandemic, supply chain issues affected all sectors of our economy. The shortage of materials and supplies were severely impacted to the vehicle manufacturing process. This led to, purchasing agreements being paused or put on hold due to vendors not being able to accept vehicle orders because of the shortage.

Moving forward, vehicle contracts are becoming available, and the manufacturing process is beginning to pick up. The supply chain issues are dissipating, and product is moving.

Please login to the link below as modifications have been made and to see what is available on the market:

<https://tripsflorida.org/contracts.html> [tripsflorida.org]

Please let us know by Friday August 18, 2023, if you are still in need of the funding as it is imperative that we work this process as quickly as possible, so your vehicle order is placed in the production line.

Please do not hesitate to contact me if you have any questions, thanks.
