Notice of Intent to Award a Sole Source Procurement

Date: January 31, 2023

NTSS # RE-NTSS-23-01

“Hydrowick Drainage system for the Pembroke Lakes Country Club”

THIS IS NOT A COMPETITIVE BID

The proposed contract action is for product or services for which the City of Pembroke Pines intends to negotiate and award with only one source under the authority of the City of Pembroke Pines Code Section 35.18 (C) (3) City standard, single-source and sole-source commodities or services. Any responses received as a result of this Notice of Intent shall be considered solely for the purpose of determining whether to conduct a competitive procurement in the future. Responses will not be considered as proposals, bids, or quotes.

The Procurement Department has received a request to make the following sole-source procurement:

Requesting Department/Office: Recreation and Cultural Arts

Product and/or services to be purchased: Hydrowick Drainage system.

Sole Source Justification: Please see Sole Source / City Standard Justification Form (Attached)

Action To Be Taken: No action is required if you agree this proposed purchase is a valid sole-source. If you do not agree that this proposed purchase is a sole-source, you may respond by submitting in writing through Bonfire the vendor's name, address, point-of-contact, telephone number, email, and a statement regarding the capability to provide the specified procurement. Interested vendors will be considered only if they respond with clear and convincing documentation that they are capable of meeting or exceeding the requirements stated herein. All responses received within **ten (10) days** after the date of publication of this synopsis will be reviewed by the City.

All responses must be in writing and submitted to the Bonfire website.

October 26, 2022

To Whom It May Concern:

We would like to inform you that Atlantic Drainage Systems Inc. is the sole provider/installer for the Hydrowick drainage element in the state of Florida. Aqua Terra Canada is the global master distributor of the Hydrowick drainage element.

Yours truly,

Revolutionary Design

A Cost Effective Drainage Solution

Hydrowick is the solution to eliminate perched and pooled water on top of playing surfaces. Address golf courses, playing fields and developments with a proven solution.

Use Hydrowick to avoid massive trenching scars and long healing/recovery times. Within hours after heavy rain, your turf will be back in playable condition for both walking and driving.

Maximize your playing season with minimal cost and ensure your turf is playable for longer periods of time with Hydrowick's ultra-absorbing capabilities. Don't let the rain stop you from playing!

Key Product Features

- Heat treated fiberglass element with excellent wicking and capillary action when water is perched around it. This provides constant 24 hour drainage when excess moisture is present in the ground.
- Internal stainless steel mesh that carries water away quickly without the gravity fall needed in traditional piping drainage systems. Extremely effective on golf course greens, tee decks and fairways.
- Cost-effective and high-quality ensuring long-term results for years to come.
- With our patented installation process we can ensure minimum downtime and a quick recovery

**5000 sq/ft green can be back in play within 24 hours

- ✓ Improve Turf Quality
- ✓ Improve Aesthetics
- ✓ Reduce Labor and Maintenance
- ✓ Reduce Damage Potential
- ✓ Maximize Play Time
- ✓ Minimize Downtime

Let's Get Technical

How Hydrowick is changing the world of drainage

When installed underground, Hydrowick is backfilled with a sand curtain allowing for surface water to efficiently drain without typical issues found in conventional drainage systems. Never worry about sediment impeding drainage or damaging systems.

Hydrowick maintains 18-20% moisture in the element which maintains healthy grass and minimizes surface scarring.

The 1 inch diameter element has proven to increase drainage of push-up greens by over 50% when compared to conventional drainage systems.

All surfaces can be played within 24 hours of Hydrowick being installed. This allows for courses and playing fields to be open longer and in-turn serve more guests.

The size of the pores of the Hydrowick element and its unique installation technique ensures that no ground composition/silting will impede drainage capabilities.

A Picture is Worth a Thousand Words

A Seamless Installation

The Aqua-Terra® patented sandbanding installation process ensures a quick installation, minimalizing invasiveness and reducing unsightly wear and closure needed for traditional piped drainage.

Our team provides world-wide service and works with you to provide the best solution.

Be back in play within 24 hours and never deal with surface pooling again!
