1. This document does not include information on volume of waste generated/disposed, whether or not sludge volume is reduced mechanically, etc... since this may impact number of loads and disposal frequency
2. * This is an approximate extrapolation based on rate per load
3. ** These cities estimate one truckload contains approximately 20 yd³ of sludge.
4. Of the five municipalities represented, Pembroke Pines, Sunrise and Coral Springs are the only 2 contracted directly to Westwind
5. *** New contract was not available for review, new contract price provided in Table
6. !! City of Sunrise has 2 water plants serviced by this contract (Springtree (Sunrise) and Southwest (Davie))
