<u>FACTOR</u>	<u>VALUE</u>	<u>DESCRIPTION</u>

SUMMARY*

**Fleet Manager's
Recommendation:**

Due to the age of the vehicle and operating conditions, this asset is prone to several failures. One of these failures comes in the form of fluid leaks. At 17 years this unit has high engine idle hours which make it susceptible to needing engine and transmission repairs which can and will be expensive in the foreseeable future. Also, due to the age of the vehicle parts may be discontinued or backorder which can delay the vehicle from returning to the road. To sum up everything that has been stated, this unit qualifies for replacement.
