SUMMARY EXPLANATION AND BACKGROUND:

1. One of the major components of the Utilities Department Capital Improvement Plan is rehabilitation of sewer pumping stations (aka lift stations), as needed, to provide continuous and reliable operation. The City's sewer system includes 198 lift stations.
2. Utilities Department Staff has identified 9 stations where the concrete sewer collection structure, known as a wet well, is significantly deteriorated due to age and the harsh environment present in sewer systems, and requires restoration.
3. In order to provide for this restoration, Staff solicited a proposal from Intercounty Engineering, Inc. Intercounty is a highly regarded company that performs wet well and manhole

rehabilitation and lining, among other activities, and has performed similar work for the City in the past. Intercounty submitted a proposal utilizing pricing established in their current contract for lift station rehabilitation and repairs with the City of Sunrise. They have proposed a total cost of \$367,726.00 for the 9 stations, which includes the larger Master Lift Station #4. Staff has reviewed this proposal and finds it to be reasonable.

4. Sufficient funds are available in the Utility Fund and budgeted for this purpose. Staff, therefore, recommends City Commission approval of an agreement with Intercounty Engineering, Inc. to rehabilitate nine (9) sewer lift station wet wells for a total amount not to exceed \$384,664.00, which consists of Intercounty's proposed cost plus a contingency amount of \$16,938.00, utilizing the pricing established from the City of Sunrise solicitation BID 22-17-03-MS, pursuant to Section 35.18(C)(5) of the City's Code of Ordinances.
