Fire Assessment Memorandum

INTRODUCTION

The City of Pembroke Pines (City) has engaged Government Services Group, Inc. (GSG) to assist the City in the update of the City's existing fire assessment program for Fiscal Year 2019-20 (Fire Assessment Project). This update is to (1) provide proforma budgets and assessment rates for Fiscal Year 2019-20 and (2) ensure continued legal defensibility related to recent legislation and case law decisions.

GSG specializes in government finance and taxation issues, in working with cities, counties, special districts, and state agencies, to develop unique funding and service delivery solutions for critical infrastructure and service needs. GSG has developed extensive experience in structuring and implementing alternative revenue sources in Florida.

This document is the City of Pembroke Pines Fire Assessment Memorandum (Assessment Memorandum), which is one of the project deliverables specified in the scope of services.

The City currently imposes fire assessments within the incorporated area based on a prior study conducted by GSG in 1996 and updated in July 2000, June 2004, June 2008, June 2011 and June 2015. Table 1 illustrates the fire assessment rates imposed for Fiscal Year 2018-19. These assessment rates generated approximately \$25,496,917 in revenues for Fiscal Year 2018-19.

| Adopted FT 2018-19 Assessment kates | | | |
|--|------------------------|--|--|
| Residential Property Use Categories | Rate Per Dwelling Unit | | |
| Residential | \$271.75 | | |
| Non-Residential Property Use Categories | Rate Per Square Foot | | |
| Commercial | \$0.5697 | | |
| Industrial/Warehouse | \$0.1777 | | |

Service Description and Assessable Cost Calculations

SERVICE DESCRIPTION

The services provided by the Pembroke Pines Fire Department include fire suppression, fire prevention, building inspections and plan review, fire investigations, public fire safety education, disaster management, rescue, emergency medical services, hazardous materials initial response, and response to other emergencies as needed.

The City of Pembroke Pines' Fire Department has an ISO rating of one, which signifies the highest level of service provided. The Pembroke Pines Fire Department facilities inventory is comprised of six stations, a garage and a training facility. Table 2 identifies the Fire Department's Building/Facility Inventory, as well as the corresponding physical location of the facility.

| Fire Department Building/Facility Inventory | | |
|---|--|--|
| Address | | |
| 600 SW 72 Avenue (Perry Airport) | | |
| 9500 Pines Boulevard (Headquarters) | | |
| 19900 Pines Boulevard | | |
| 13000 SW 1 Street (Century Village) | | |

The City has entered into a statewide mutual aid agreement to provide assistance during emergencies and disasters.

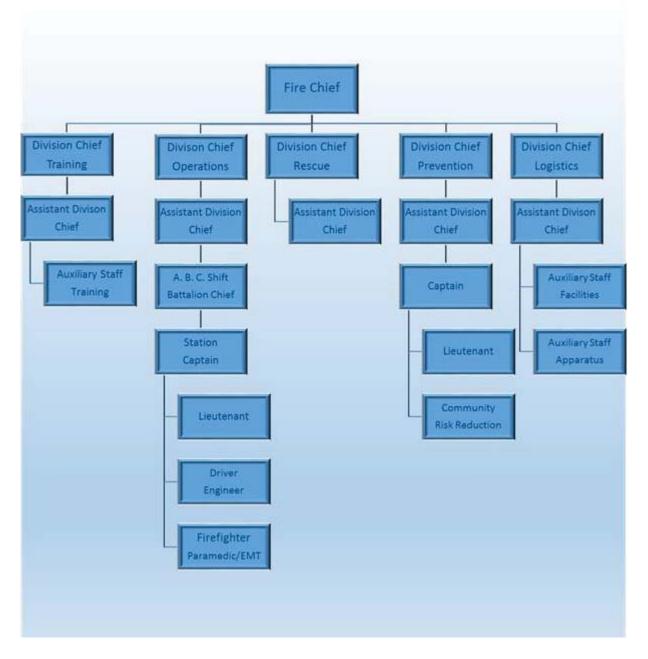

The City has entered into a consolidated mutual aid agreement with the surrounding Broward County cities for mutual assistance on emergency scenes. There is no monetary compensation for this agreement.

The City entered into an agreement with Broward County to participate in the Consolidated Regional E-911 Communications System which provides a countywide initiative to coordinate and fund a regional dispatch service and ultimately improve 911 communications throughout Broward County. The dispatch functions include all emergency and non-emergency calls for fire services, emergency medical services and police services. Operating costs are funded pursuant to Section 318.21(9), Florida Statutes.

Tables 3 through 6 outline the Fire Department's current service operations and service components. Table 3 outlines the Fire Department's organizational structure. Table 4 describes the minimum staffing for each apparatus. This information is used in the development of the Administrative Factor, as further discussed in the "Development of Factors" section of this Assessment Memorandum.

Table 5 lists the location and the fire flow/pumping capacity of the Fire Department's apparatus. This information is used to determine the square footage cap for non-residential properties. Table 6 details the Fire Department's response protocol.

The current pumping capacity is defined as the combined amount of water that apparatus in the Fire Department can pump to a first alarm, non-residential fire. As outlined by Table 5, the pumping capacity for all apparatus of the Fire Department is 23,500 gallons per minute. Accordingly, based on National Fire Protection Association firefighting standards for fire-flow, the Fire Department currently has sufficient fire-flow capacity to provide service coverage in the event of a structure fire involving unlimited square feet.¹

DEVELOPMENT OF FACTORS

FIRE RESCUE v. EMERGENCY MEDICAL SERVICES

In June 2000, litigation over the City of North Lauderdale fire rescue assessment program resulted in a decision by the Fourth District Court of Appeals in the case of <u>SMM Properties</u>, Inc. v. City of North <u>Lauderdale</u>, (the "North Lauderdale" case). The Fourth District Court of Appeals concluded that emergency medical services (EMS) did not provide a special benefit to property. The Court, however, reaffirmed that fire suppression, fire prevention, fire/building inspections and first response medical services do provide a special benefit to property. In August 2002, the Florida Supreme Court upheld the decision of the Fourth District Court of Appeals.

To address these concerns, GSG has developed a methodology that removes the costs associated with emergency medical services. This method of splitting the fire and EMS portions of a consolidated public safety department's budget was upheld by the Fourth District Court of Appeals in July 2010 in <u>Desiderio</u> <u>Corporation, et al. v. The City of Boynton Beach, Florida, et al.</u>, 39 So.3d 487 (Fla. 4th DCA 2010).

The projected Fiscal Year 2019-20 departmental costs were allocated between fire rescue and emergency medical services because of the Florida Supreme Court's opinion in <u>City of North Lauderdale v. SMM</u> <u>Properties</u> that emergency medical services (above the level of first response) does not provide a special benefit to property. Accordingly, the fire rescue costs were split from emergency medical service costs based on the following general guidelines.

DIRECT ALLOCATIONS

To the extent that certain line items could be allocated directly to fire, direct allocations were made. All costs directly related to fire such as "Protective Clothing," "Nozzles," "Ladders" and "Hoses" were totally allocated to fire. All costs directly related to emergency medical services were removed entirely.

ADMINISTRATIVE FACTOR

Certain line items were allocated between fire and EMS based on an Administrative Factor. This Administrative Factor is derived by creating a ratio between non-EMS or fire personnel and total combat personnel across all shifts within a 24-hour period. On average, under normal staffing, the City has 30 non-EMS personnel and 21 EMS personnel, for a total of 51 combat personnel. This normal staffing yields a 58.82% non-EMS Administrative Factor.

This percentage was then applied to all applicable line items to allocate the costs that could not be directly allocated as fire costs or EMS costs, and that could not be operationally allocated. For example, an Administrative Factor was applied to the personnel expenditures for salaries and benefits, and the line item expenditures for "Building Maintenance," "Electric," "Water & Sewer," and "Office Supplies" to determine the fire service costs of these line items.

OPERATIONAL FACTOR

Fire Rescue Operational Factor

Other assessable cost line items may also be allocated between fire and EMS based on an Operational Factor. The Operational Factor is derived by creating a ratio between non-EMS (fire) calls and EMS calls. This ratio, which is based on the Fire Department's operations, was applied to certain budget line items such as "Fuel."

The fire rescue department incidents are tracked using both CAD dispatch (for EMS and transport only incidents) and the State Fire Marshal office's Florida Fire Incident Reporting System (FFIRS). FFIRS is a tool

for fire rescue departments to report and maintain computerized records of fire rescue incidents and other department activities in a uniform manner. Under this system, a series of basic phrases with code numbers are used to describe fire rescue incidents. Appendix A provides a codes list for the "type of situation found" as recorded on the fire rescue incident reports used to identify EMS and non-EMS calls.

To develop the Operational Factor for the City, GSG obtained fire rescue incident data identifying the number of fire rescue calls made to property categories within the City for a one-year period (Calendar Year 2018). The City's fire rescue incident data was used to determine the demand for fire rescue services.

The ratio between non-EMS (fire) calls and EMS calls is then applied to all applicable line items to allocate the costs that could not be directly allocated as fire costs or EMS costs, and that could not be administratively allocated. For the one-year period (Calendar Year 2018), the City reported 21,115 total fire rescue incident calls, of which 3,840 were non-EMS (fire) calls and 17,275 were EMS calls. This information results in an 18.19% non-EMS Operational Factor.

ASSESSABLE COST CALCULATIONS

The assessable cost calculations for Fiscal Year 2019-20 are based on the following assumptions for the purpose of this Assessment Memorandum.

- The City provided the preliminary FY 2019-20, Fire Rescue Division budget. The expenses and revenues associated with emergency medical services were removed.
- The City provided the preliminary FY 2019-20 Fire Prevention Division budget. The expenses and revenues were allocated directly to fire.
- Because the City participates in the Consolidated Regional E-911 Communications System, there are no costs associated with dispatch services.
- Revenues are shown as a reduction of the total projected expenditures, thereby reducing the total assessable costs. Revenues received from interim fire assessment fees, interest on fire protection assessments, beginning surplus, annual fire inspections, life safety plan reviews, fire equipment assessment, firefighter supplemental comp, false alarm fees, and fee expediting overtime were allocated directly to fire.
- The line item "Statutory Discount" under "Miscellaneous Assessment Expenditures" reflects a 95% collection of the Fire Assessment to cover the 4% statutory discount allowed by the Uniform Method and 1% reserve for under collection. Accordingly, the statutory discount is budgeted at 5% of the total assessable costs.
- Pursuant to section 197.3632, Florida Statutes, the tax collector and property appraiser may each enter into an agreement with the local government for reimbursement of necessary administrative costs incurred from the collection of the non-ad valorem assessment. Accordingly, if any such fee(s) is charged, the fee may be recouped as an add-on to the total assessable costs for the year.

City Object Code 49201 Taxes and/or Assessments is the Property Appraiser's cost for services relating to creating and maintaining a non-ad valorem tax roll and providing notice of the fire assessment in the annual TRIM notices.

At this time, the Tax Collector does not charge for their services associated with collection of the fire assessment; therefore, no collection costs were included.

Table 7 shows the projection of the full cost of the fire assessment program for Fiscal Year 2019-20 based on the above assumptions.

Table 7 Fire Assessable Cost Calculations (FY 2019-20)

Determination of Fire Services Demand

INCIDENT DATA

GSG obtained information from the City in an electronic format, identifying the number and type of fire incident responses by City fire vehicles for calendar year 2018.

The fire rescue department incidents are tracked using both CAD dispatch (for EMS and transport only incidents) and the State Fire Marshal office's Florida Fire Incident Reporting System (FFIRS). FFIRS is a tool for fire rescue departments to report and maintain computerized records of fire rescue incidents and other department activities in a uniform manner. Under this system, a series of basic phrases with code numbers are used to describe fire rescue incidents. Appendix A provides a codes list for the "type of situation found" as recorded on the fire rescue incident reports used to identify EMS and non-EMS (fire) calls.

Another data field in the FFIRS, "fixed property use," identifies the type of property that fire departments respond to for each fire incident. The fixed property uses correlate to property uses determined by the Broward County Property Appraiser on the ad valorem tax roll. Appendix B provides a codes list for the "fixed property use" as recorded on the fire incident reports.

GSG analyzed one year of fire incident data (calendar year 2018) to evaluate trends and determine if aberrations were present. The one year fire incident data for calendar year 2018 represents 21,115 fire rescue incidents.

Of the 21,115 fire rescue incidents, there were 17,275 incidents classified as EMS type incidents based on the type of situation found indicated on the incident report. The 17,275 EMS type incidents were not included in the analysis.

There are certain fire rescue incidents that could not be assigned to a specific property or parcel. These calls represent non-specific type incidents, which are incidents that either could not be correlated to a specific parcel or calls that involved auto accidents and other types of incidents along roads and highways.

Of the 3,840 remaining fire type incidents, 3,096 were calls to specific property uses. The remaining 744 incidents were considered non-specific type incidents. The City's budget is sized based upon its ability to provide service to improved property within its boundaries. Therefore, the level of services required to meet anticipated demand for fire rescue services and the corresponding annual fire rescue budget required to fund fire rescue services provided to non-specific property uses would be required notwithstanding the occurrence of any incidents from such non-specific property use.

Because of the urbanized character of the City, the suppression of fires on vacant land and agricultural property primarily benefits adjacent property by containing the spread of fire rather than preserving the integrity of the vacant parcel. Thus, incidents to vacant and agricultural property were not included in the final analysis of the fire call database. The 22 calls to these two property use categories were removed.

Using the fixed property use codes, the remaining 3,074 fire type incidents corresponding to specific properties were assigned to the following property use categories: residential, commercial, industrial/warehouse and institutional. Incidents to government properties, religious buildings, institutional parcels, nursing homes, and educational properties were aggregated into an "institutional" category.

Table 8 outlines the property use category assignment of fire incidents based on the analysis conducted.

| Fire Calls by Category (Calendar Year 2018) | | | | |
|---|---|--|--|--|
| Number of Incidents | Percentage of Calls | | | |
| 1,963 | 63.86% | | | |
| 678 | 22.06% | | | |
| 48 | 1.56% | | | |
| 385 | 12.52% | | | |
| 3,074 | 100 % | | | |
| | Number of Incidents 1,963 678 48 385 | | | |

Source: City of Pembroke Pines Fire Department

PROPERTY DATA

The City provided GSG with the number of dwelling units and non-residential square footage for each property category which were obtained from the City's special assessment roll maintained by the Broward County Property Appraiser's Office.

Each property use within the City on the ad valorem tax roll was assigned, by the City, to one or more of the property use categories based on their assignment of use by the Broward County Property Appraiser or verification of use obtained through field research based on the Florida Department of Revenue (DOR) two digit property use codes reflected in the Rule 12D-8.008, Florida Administrative Code. A listing of Broward County's Property Use (DOR) codes is provided as Appendix C.

Further analysis was conducted to determine the use of each building on a parcel. The Property Appraiser assigns a building improvement code based on a building's assigned use on a parcel of property. An analysis regarding building improvement types based on the assignment of use by the Broward County Property Appraiser was conducted. A list of building improvement codes used by the Broward County Property Appraiser and associated assessment category is provided as Appendix D.

For parcels assigned to the residential property use category, the total number of dwelling units was determined.

For parcels within the non-residential property use categories of commercial, industrial/warehouse and institutional, the amount of square footage of the non-residential structures was determined from the building files on the ad valorem tax roll.

Computation of Fire Assessments

ASSESSMENT CLASSIFICATIONS

This section of the memorandum includes the recommended parcel classifications and preliminary assessment rates as calculated within this Assessment Memorandum.

The fire assessment cost calculations provided herein are primarily based on information supplied by the City. The assessable cost projections developed by GSG are designed to forecast preliminary assessment rates within each property use category for Fiscal Year 2019-20.

SPECIAL BENEFIT ASSUMPTIONS

The following assumptions support a finding that the fire services, facilities, and programs provided by the City provide a special benefit to the assessed parcels.

- Fire services, facilities, and programs possess a logical relationship to the use and enjoyment of property by: (i) protecting the value and integrity of improvements and structures through the availability and provision of comprehensive fire services; (ii) protecting the life and safety of intended occupants in the use and enjoyment of property; (iii) lowering the cost of fire insurance by the presence of a professional and comprehensive fire program; and (iv) containing fire incidents occurring on land with the potential to spread and endanger other property and property features.
- The availability and provision of comprehensive fire services enhance and strengthen the relationship of such services to the use and enjoyment of the parcels of property, the market perception of the area and, ultimately, the property values within the assessable area.

APPORTIONMENT METHODOLOGY

The following section describes the recommended assessment apportionment methodology for fire services based on: (i) the fire assessable cost calculations; (ii) the ad valorem tax roll maintained by the City; and (iii) the fire incident data.

COST APPORTIONMENT

The Fiscal Year 2019-20 assessable costs calculation was apportioned among property use categories based upon the historical demand for fire services reflected by the fire incident data for calendar year 2018. This apportionment is illustrated in Table 9.

Table 9Cost Apportionment (FY 2019-20)

| Category | Number of Incidents | Percentage of Calls | Allocation of Assessable Costs |
|----------------------|------------------------|------------------------|-----------------------------------|
| Residential | 1,963 | 63.86% | \$18,038,964 |
| Commercial | 678 | 22.06% | \$6,230,473 |
| Industrial/Warehouse | 48 | 1.56% | \$441,095 |
| Institutional | 385 | 12.52% | \$3,537,953 |
| Total | 3,074 | 100% | \$28,248,485 |

PARCEL APPORTIONMENT

The share of the assessable costs apportioned to each property use category was further apportioned among the individual buildings of property within each property use category in the manner described in Table 10.

 Table 10

 Parcel Apportionment within Property Use Categories

| Category | Parcel Apportionment |
|-----------------------|----------------------|
| Residential | Dwelling Unit |
| Non-Residential | |
| -Commercial | Caucia Fastara |
| -Industrial/Warehouse | Square Footage |
| -Institutional | |

Applying the foregoing parcel apportionment methodology, fire assessment rates were computed for each property use category. The specific methodology, underlying special benefit and fair apportionment assumptions are included below and generally described.

RESIDENTIAL PARCEL APPORTIONMENT ASSUMPTIONS

The following assumptions support findings that the parcel apportionment applied in the Residential Property Use Category is fair and reasonable. The Residential Property Use Category includes such properties as single-family dwelling units and multi-family dwelling units.

- The size or the value of the residential parcel does not determine the scope of the required fire services. The potential demand for fire services is driven by the existence of a dwelling unit and the anticipated average occupant population.
- Apportioning the assessed costs for fire services attributable to the residential property use category on a per dwelling unit basis is required to avoid cost inefficiency and unnecessary administration, and is a fair and reasonable method of parcel apportionment based upon historical demand for services.
- The historical demand for fire protection service availability for multi-family and single family residential property is substantially similar and any difference in the percentage of documented fire protection calls to such specific property uses is statistically insignificant.

RESIDENTIAL PARCEL APPORTIONMENT CALCULATION

Based upon the historical demand for fire services, the percentages of assessable costs attributable to residential properties were calculated. The amount of the assessable costs allocable to the residential

property use category was divided by the number of dwelling units in the City to compute the fire assessment to be imposed against each dwelling unit. For each residential parcel, the actual number of dwelling units located on the parcel will be multiplied by the residential dwelling unit rate to compute the residential fire assessment amount for the parcel.

Table 11 illustrates the assignment of dwelling units under this apportionment methodology to the Residential Property Use Category.

| Table 11 Parcel Apportionment Residential Property Use Category | | | | |
|---|--------------------------|--|--|--|
| Residential Property Use Category | Number of Dwelling Units | | | |
| Residential | 63,883 | | | |

Source: City of Pembroke Pines, (2019).

NON-RESIDENTIAL PARCEL APPORTIONMENT ASSUMPTIONS

The Non-Residential Property Use Category includes commercial, industrial/warehouse, and institutional property uses.

The capacity to handle fires in Non-Residential Property Use Category is governed by the following:

• The current pumping capacity is defined as the combined amount of water that apparatus in the Fire Department can pump to a first alarm, non-residential fire. As outlined by Table 5, the pumping capacity for all apparatus of the Fire Department is 23,500 gallons per minute. Accordingly, based on National Fire Protection Association firefighting standards for fire-flow, the Fire Department currently has sufficient fire-flow capacity to provide service coverage in the event of a structure fire involving unlimited square feet.²

The following assumption supports findings that the parcel apportionment applied in the Non-Residential Property Use Category is fair and reasonable.

• The separation of the non-residential buildings by actual square footage is fair and reasonable for the purpose of parcel apportionment because the demand for fire services, fire flow, fire fighters, quantity and size of apparatus, and other special firefighting equipment is determined and measured by the actual square footage of structures and improvements within benefited parcels.

NON-RESIDENTIAL PARCEL APPORTIONMENT CALCULATION

Based upon the historical demand for fire services, property in the Non-Residential Property Use Category will be responsible for funding a percentage of assessable costs. The amount of the assessable costs allocable to each non-residential parcel will be based upon the aggregate of all non-residential building square footage situated on the parcel.

The respective non-residential assessment rate was determined by multiplying the percent of total fire calls attributable to non-residential property by the total assessable costs. This calculated amount of assessable costs was then divided by the number of non-residential square feet to obtain an assessment amount per square foot.

² Source: National Fire Protection Association, "NFPA 1 Fire Code, 2015, Chapter 18"

Table 12 illustrates the assignment of square footage for parcels under this apportionment methodology in the Non-Residential Property Use Categories.

| Parcel Apportionment Non-Residential Property Use Categories | | | | |
|--|--------------------------|--|--|--|
| Non-Residential Property Use Categories | Number of Square Feet | | | |
| Total Commercial | 12,946,783 | | | |
| Total Industrial/Warehouse | 4,224,776 | | | |
| Total Institutional | 7,542,652 | | | |

Source: City of Pembroke Pines, (2019)

Table 40

COMPUTATION OF FIRE ASSESSMENT RATES

Applying the parcel apportionment methodology, fire assessment rates were computed for each specified property use category. Based on the assessable costs of providing fire services, the number of fire calls apportioned to specific property categories, and the number of billing units within the specified property categories, Table 13 illustrates the preliminary assessment rates after application of the assessment methodology based on 100 percent funding of the total assessable costs for Fiscal Year 2019-20.

Table 13 FY 2019-20 Preliminary Fire Assessment Rates

(100% of Assessable Costs = \$28,248,485 Gross Revenue)

| Residential Property Use Categories | Rate Per Dwelling Unit | | | |
|--|------------------------|--|--|--|
| Residential | \$282.38 | | | |
| Non-Residential Property Use Categories | Rate Per Square Foot | | | |
| Commercial | \$0.4812 | | | |
| Industrial/Warehouse | \$0.1044 | | | |
| Institutional | \$0.4691 | | | |

*Estimated Gross Revenue: \$28,248,485; Estimated Exempt Buy-down: \$3,512,767; Estimated Net Revenue: \$24,735,718

EXEMPTIONS AND IMPACT OF EXEMPTIONS

In the current methodology, the City identified the aggregate cost for the fire services that are available to institutional tax-exempt, homesteaded property owned by totally and permanently disabled veterans, and governmental parcels within the City. The City made a policy decision to exempt institutional tax-exempt, homesteaded property owned by totally and permanently disabled veterans, and governmental properties, and have funded the proportional assessed costs allocated to such exemptions from the other legally available sources because the financial burden of such exemptions cannot be apportioned to non-exempt parcels. The estimated revenue from all institutional tax-exempt, homesteaded property owned by totally and permanently disabled veterans, and governmental properties, based on 100 percent of the assessable costs of \$28,248,485, is approximately \$3,512,767 using the updated assessment methodology.

Outstanding Issues

Issue 1: Administrative Factor Calculation

The administrative factor calculation was based on information provided by the City for normal staffing levels. Any changes to the staffing levels could result in a revised administrative factor which could increase or lower the amount of assessable costs to be collected.

Issue 2: Non-Specific Calls

In the fire call analysis, certain fire related calls were classified as non-property specific, because of the location of occurrence in the incident report. These calls represent non-specific incidents that either could not be correlated to a specific parcel or involved auto accidents or other types of incidents along roads and highways. These calls are excluded from the analysis that determines the percentage of calls for service to respective property types and therefore, are not considered in the determination of the extent of budget required to fund the department. Because the budget is established based on the ability of the department to adequately protect structures, no adjustment has been made to the budget due to non-property specific calls. Further, even if such calls did affect the cost of the department's operations, there are sufficient non-assessment revenues available to offset any impact upon the budget.

Appendix A

SITUATION FOUND CODES & DESCRIPTIONS

| Situation Found Code | Description | EMS Type Call |
|----------------------|---|---------------|
| 100 | Fire, Other | No |
| 110 | Fire, Structure | No |
| 111 | Building Fire | No |
| 1110 | Building Fire | No |
| 112 | Fires in structures other than in a building | No |
| 113 | Cooking fire, confined to a container | No |
| 118 | Trash or rubbish fire, contained | No |
| 130 | Mobile property (vehicle) fire, other | No |
| 131 | Passenger vehicle fire | No |
| 132 | Road freight or transport vehicle fire | No |
| 140 | Natural vegetation fire | No |
| 141 | Forest, woods or wildland fire | No |
| 142 | Brush, or brush and grass mixture fire | No |
| 143 | Grass fire | No |
| 150 | Outside rubbish fire, other | No |
| 151 | Outside rubbish, trash or waste fire | No |
| 152 | Garbage dump or sanitary landfill fire | No |
| 154 | Dumpster or other outside trash receptacle fire | No |
| 155 | Outside stationary compactor/compacted trash fire | No |
| 160 | Special outside fire, other | No |
| 162 | Outside equipment fire | No |
| 200 | Overpressure rupture, explosion, overheat, other | No |
| 221 | Overpressure rupture of air or gas pipe/pipeline | No |
| 251 | Excessive heat, scorch burns with no ignition | No |
| 300 | Rescue, EMS call, other | Yes |
| 311 | Medical assist, assist EMS crew | Yes |
| 320 | Allergic reaction | Yes |
| 321 | EMS call, excluding vehicle accident with injury | Yes |
| 322 | Vehicle accident with injuries | Yes |
| 323 | Motor vehicle/pedestrian accident (MV Ped) | Yes |
| 324 | Motor Vehicle Accident, No Injuries | No |
| 331 | Lock-in (if lock out, use 511) | No |
| 341 | Search for person on land | No |
| 352 | Extrication of victim(s) from vehicle | No |
| 353 | Removal of victim(s) from stalled elevator | No |
| 354 | Trench/below grade rescue | No |
| 360 | Water & ice related rescue, other | No |
| 361 | Swimming/recreational water areas rescue | No |
| 365 | Watercraft rescue | No |
| 370 | Electrical rescue | No |
| 381 | Rescue or EMS standby | Yes |
| 400 | Hazardous condition, other | No |
| 410 | Flammable gas or liquid condition, other | No |
| 411 | Gasoline or other flammable liquid spill | No |

| Situation Found Code | Description | EMS Type Call |
|----------------------|---|---------------|
| 412 | Gas leak | No |
| 413 | Oil or other combustible liquid spill | No |
| 420 | Toxic condition, other | No |
| 422 | Chemical spill or leak | No |
| 424 | Carbon monoxide incident | No |
| 440 | Electrical wiring/equipment problem, other | No |
| 441 | Heat from short circuit (wiring), defective/worn | No |
| 442 | Overheated motor | No |
| 443 | Light ballast breakdown | No |
| 444 | Power line down | No |
| 445 | Arcing, shorted electrical equipment | No |
| 460 | Accident, potential accident, other | No |
| 461 | Building or structure weakened or collapsed | No |
| 462 | Aircraft standby | No |
| 463 | Vehicle accident, general cleanup | No |
| 471 | Explosive, bomb removal (for bomb scare, use 721) | No |
| 500 | Service call, other | No |
| 510 | Person in distress, other | No |
| 511 | Lock-out | No |
| 512 | Ring or jewelry removal | No |
| 520 | Water problem, other | No |
| 521 | Water evacuation | No |
| 522 | Water or steam leak | No |
| 531 | Smoke or odor removal | No |
| 540 | Animal problem, other | No |
| 541 | Animal problem | No |
| 542 | Animal rescue | No |
| 550 | Public service assistance, other | No |
| 551 | Assist police or other governmental agency | No |
| 552 | Police matter | No |
| 553 | Public service | No |
| 554 | Assist invalid | Yes |
| 555 | Defective elevator | No |
| 561 | Unauthorized burning | No |
| 600 | Good intent call, other | No |
| 611 | Dispatched & canceled en route | No |
| 621 | Wrong location | No |
| 622 | No incident found upon arrival | No |
| 650 | Steam, other gas mistaken for smoke, other | No |
| 651 | Smoke scare, odor of smoke | No |
| 652 | Steam, vapor, fog or dust thought to be smoke | No |
| 671 | Hazmat release investigation w/no hazmat | No |
| 700 | False alarm or false call, other | No |
| 710 | Malicious, mischievous false call, other | No |

| Situation Found Code | Description | EMS Type Call |
|----------------------|--|---------------|
| 711 | Municipal alarm system, malicious false alarm | No |
| 714 | Central station, malicious false alarm | No |
| 715 | Local alarm system, malicious false alarm | No |
| 730 | System malfunction | No |
| 731 | Sprinkler activation due to malfunction | No |
| 733 | Smoke detector activation due to malfunction | No |
| 734 | Heat detector activation due to malfunction | No |
| 735 | Alarm system sounded due to malfunction | No |
| 736 | CO detector activation due to malfunction | No |
| 740 | Unintentional transmission of alarm, other | No |
| 741 | Sprinkler activation, no fire - unintentional | No |
| 742 | Extinguishing system activation | No |
| 743 | Smoke detector activation, no fire - unintentional | No |
| 744 | Detector activation, no fire - unintentional | No |
| 745 | Alarm system sounded, no fire - unintentional | No |
| 746 | Carbon monoxide detector activation, no CO | No |
| 751 | | No |
| 900 | Special type of incident, other, Dumpster fire | No |
| 911 | Citizen complaint | No |
