Order Note: General System Description
Proposal #195738.3 SAFEWARE - Milestone Recording Server & Config (x12 channels)

SWT consisting of Safeware and Security 101 shall provide and install a new 1U recording server to manage and record 12 channels of HD Video utilizing Milestone VMS.

VMS Licensing and network connectivity to the main application server is the responsibility of the City.

This servers recording and throughput calculations were based off of customer provided information in regards to the recording schedule and resolutions of cameras being connected and managed by this server.

Server included for this site is too deep for the existing patch panel rack. The 1U server will be mounted vertically with a 4U vertical wall mount.

A single day of labor is included to accommodate the installation. It is intended that City personnel will program any remaining devices not programmed in the initial day of installation. If additional labor is requested by the City, a change order request will be presented for approval, as needed.
