18 AUG 16 PM 3:16

Mayor Frank Ortiz
601 City Center Way
Pembroke Pines, FL 33025

On behalf of the residents of Northwest 107th Avenue and Northwest 17th Place, I am requesting a wavier of the requirements for speed humps to be installed on Northwest 107th Avenue and Northwest 17th Place.

All residents on the 107th Avenue and 17th Place signed the petition. I submitted all paperwork to the Public Services Department. When I called to check on the status, I was told we do not have the lineal feet necessary for speed humps. I was hoping an exception could be made knowing we all want the residents of Pembroke Pines safe.

Last year when speed humps were installed on 106th Terrace, our streets became the shortcut for speeders. Several residents had mailboxes knocked down and residents' swale areas torn-up. There are six families with small children and several elderly families whose safety and health are affected when cars go speeding down our street.

There are also a couple residents that have security cameras that have captured video of the cars speeding. I know the residents are not making a tape of the speeders, but they have told me that they have seen the cars when they are looking at their security tape.

I am asking you to reconsider the placement of speed humps on 107th Avenue and 17th Place.

Thank you in advance for the consideration.

Sincerely,

Diane N. Horodowich
