1.2 PURPOSE

The City owns and operates water and wastewater treatment, collection and distribution facilities which have been in service since the 1970's. The critical components of these facilities are served by Florida Power and Light through critical electrical infrastructure which is aging.

Similar to other infrastructure rehabilitation and replacement projects, the electrical systems at these facilities need to be evaluated and projects must be determined and funded to maintain their serviceability. Due to the age of some of the electrical equipment, there are growing concerns that their useful life have been reached or is imminent. Failure of electrical infrastructure may mean interruption of water treatment, distribution and disposal to the Citizens as well as regulatory ramifications.

It is expected that projects of this nature will have a construction cost greater than \$325,000 each. Therefore, in accordance with the Consultants Competitive Negotiations Act (CCNA), the pool of electrical engineers selected in 2018 by the City may not be utilized.

It is also expected that projects of this nature will have a construction cost of less than \$2,000,000 each. In addition, due to the nature of this work, consistency is desired by the City in the design and implementation of electrical improvements. Therefore, staff recommends the City advertise for a Continuing Contract for Plant Electrical Engineering Services in accordance with the CCNA.

The City of Pembroke Pines is seeking qualification statements from qualified firms, to serve in the capacity of Power Electrical Engineers, in accordance with the terms, conditions, and specifications contained in this solicitation and in accordance with the Consultant's Competitive Negotiation Act (C.C.N.A. – Florida Statute 287.055).

The City anticipates on establishing a Continuing Contract with a firm that can be used on an as needed basis. The intent of the RFQ is to select one firm that can provide these services.

The City intends to enter into a "continuing contract", as defined by Florida Statute 287.055(2)(g), with one firm.

Firms may not submit responses which include sub-consultants.

No minimum amount of professional services or compensation will be assured to the firm that is awarded and the CITY shall preserve its option to retain other professional service firms or to perform work "in-house" for any particular project or assignment at its sole discretion.

The City shall encourage the awarded firm to submit, annually, statements of qualifications and performance data. In addition, the City may also re-solicit these services to replace the professional service provider, at any time, as-needed.

You do not need to answer these questions unless we display a valid Office of Management and Budget (OMB) control number. The OMB control number for this collection is 9000-0157. PURPOSE

Federal agencies use this form to obtain information from architect-engineer (A-E) firms about their professional qualifications. Federal agencies select firms for A-E contracts on the basis of professional qualifications as required by 40 U.S.C. chapter 11, Selection of Architects Engineers, and Part 36 of the Federal Acquisition Regulation (FAR).

The Selection of Architects and Engineers statute requires the public announcement of requirements for A-E services (with some exceptions provided by other statutes), and the selection of at least three of the most highly qualified firms based on demonstrated competence and professional qualifications according to specific criteria published in the announcement. The Act then requires the negotiation of a contract at a fair and reasonable price starting first with the most highly qualified firm.

The information used to evaluate firms is from this form and other sources, including performance evaluations, any additional data requested by the agency, and interviews with the most highly qualified firms and their references.

GENERAL INSTRUCTIONS

Part I presents the qualifications for a specific contract.

Part II presents the general qualifications of a firm or a specific branch office of a firm. Part II has two uses:

1. An A-E firm may submit Part II to the appropriate central, regional or local office of each Federal agency to be kept on file. A public announcement is not required for certain contracts, and agencies may use Part II as a basis for selecting at least three of the most highly qualified firms for discussions prior to requesting submission of Part I. Firms are encouraged to update Part II on file with agency offices, as appropriate, according to FAR Part 36. If a firm has branch offices, submit a separate Part II for each branch office seeking work.

2. Prepare a separate Part II for each firm that will be part of the team proposed for a specific contract and submitted with Part I. If a firm has branch offices, submit a separate Part II for each branch office that has a key role on the team.

INDIVIDUAL AGENCY INSTRUCTIONS

Individual agencies may supplement these instructions. For example, they may limit the number of projects or number of pages submitted in Part I in response to a public announcement for a particular project. However, do not double count the revenues received on a particular project.

11. Annual Average Professional Services Revenues of Firm for Last 3 Years. Complete this block for the firm or branch office for which this Part II is prepared. Enter the appropriate revenue index numbers to reflect the professional services revenues received annually (averaged over the last 3 years) by the firm or branch office. Bid Comments

The City owns and operates water and wastewater treatment, collection and distribution facilities which have been in service since the 1970's. The critical components of these facilities are served by Florida Power and Light through critical electrical infrastructure which is aging.

Similar to other infrastructure rehabilitation and replacement projects, the electrical systems at these facilities need to be evaluated and projects must be determined and funded to maintain their serviceability. Due to the age of some of the electrical equipment, there are growing concerns that their useful life have been reached or is imminent. In addition, due to the nature of this work, consistency is desired by the City in the design and implementation of electrical improvements. Therefore, staff recommends the City advertise for a Continuing Contract for Plant Electrical Engineering Services in accordance with the CCNA.
