Bid Notes	We have over 30 years of experience that proves belt press technologies are more efficient and cost effective for water municipalities. There are many benefits that the water plant is missing out on by continuing the old excavation method.			
Agency Notes:		Supplier Notes: We have over 30 years of experience that proves belt press technologies are more efficient and cost effective for water municipalities. There are many benefits that the water plant is missing out on by continuing the old excavation method.		
Item #	Line Item	Unit Price	Qty/Unit	Total Price
PSUT-19-08--01-01	Cost per cubic yard of lime sludge hauled - First Offer	\$11.05	27500 / cubic yard	\$303,875.00

Product Code: Agency Notes:		Supplier Product Code: Dredge/Belt Press Supplier Notes: We will be using a dredge and a belt press. This will benefit the water authority greatly. The pressed material final product will have less water than conventional excavation- therefore less cubic yards will be removed to obtain the same results- saving money for our client. This will also allow the water plant to use the "drying pong" as an additional wet lagoon if they choose to and they can double their capacity. Our process does not require a dry lagoon.		
PSUT-19-08-01-02	Tipping Fee per ton disposed - Alt 1	\$38.50	25500 / ton	\$981,750.00
Product Code: Agency Notes:		Supplier Product Code: Beneficial Reuse Supplier Notes: With the more engineered process of using our belt press technology, we would be able to use this dryer material in our beneficial reuse market. The costs savings to do this are significant. Samples and testing must be done to ensure the material is non-hazardous and can in fact be land applied.		
	First Offer	\$91.80	25500 / ton	\$2,340,900.00
Product Code: Agency Notes:		Supplier Product Code: Land Fill Supplier Notes: With this option, the sludge will be disposed of at the South Dade Landfil. Again, using the belt press technology, we will be removing more water weight from each load which will save the water plant money on disposal.
