18.2.4. The assignment and/or transfer of this Agreement or execution or attachment thereon by CONTRACTOR or any other party in a manner not expressly permitted hereunder.

If the abandonment, delay, refusal, failure, neglect or default is not cured within seven (7) days of when notice was sent by CITY, CITY may declare a default of the Agreement and notify CONTRACTOR of such declaration of default and terminate the Agreement.

18.3.1. Upon such declaration of default, all payments remaining due CONTRACTOR at the time of default, less all sums due CITY for damages suffered, or expenses incurred by reason of default, shall be due and payable to CONTRACTOR.

18.3.2. CITY may complete the Agreement, or any part thereof, either by day labor or re-letting a contract for the same, and procure the equipment and the facilities necessary for the completion of the Agreement, and charge the cost of same to CONTRACTOR and/or the Surety together with the costs incident thereto to such default.

18.3.3. In the event CITY completes the Agreement at a lesser cost than would have been payable to CONTRACTOR under this Agreement, if the same had been fulfilled by CONTRACTOR, CITY shall retain such differences. Should such cost to CITY be greater, CONTRACTOR shall pay the amount of such excess to the CITY.

18.3.4 Notwithstanding the other provisions in this Article, CITY reserves the right to terminate the Agreement at any time, whenever the service provided by CONTRACTOR fails to meet reasonable standards of the trade after CITY gives written notice to the CONTRACTOR of the deficiencies as set forth in the written notice within fourteen calendar (14) days of the receipt by CONTRACTOR of such notice from CITY.

1.10 FREQUENTLY ASKED QUESTIONS (FAQs)

Question # 1	Who is the current hauler?
Answer	Westwind Contracting, Inc. is the current hauler.

Question # 2	What is the current price per cubic yard for “Lime Sludge Removal and Hauling at the Water Treatment Plant?”
Answer	The current price is \$8.90 per cubic yard.

Question # 3	How do you measure the quantity of each truck?
Answer	The contractor currently uses 20 cubic yard trucks to remove the material from the dry pit. The contractor must provide documentation on the volume for all trucks used to remove material from the water plant site. City personnel will verify that all trucks leave the site full.

Question # 4	Is it necessary to provide any information and/or permits for the final destination (dump location) of the sludge removed from the water plant?
Answer	The contractor is required to provide sufficient information to insure the contractor is legally disposing of the material. The amount of information required will depend on where and how the material is being disposed of. All material is subject to review and approval. The City of Pembroke Pines retains the right to disqualify any contractor that does not provide sufficient documentation to verify that the material is being legally disposed of.

Question # 5	Could you give me an idea on what method of removal you have planned for the sludge in this project? Can it be vacuumed, excavated or will it need to be dredged?
Answer	The contractor needs to excavate the lime sludge from the wet pond to the dry pond about every 4-6 weeks. The lime then must sit in the dry pond for a minimum of 4-6 weeks to dry before it can be placed in trucks by the contractor then removed from the site. The material has been excavated from both the wet and dry ponds at the water plant site for more than 25 years. We believe excavation is the most practical method for removing this material from the site. However, means and methods are at the discretion of the contractor. Any method will be considered provided the contractor can meet the demands for material removal and not take up extensive space or cause damage to any portion of the water plant.

City of Pembroke Pines

Re: Bid No: PSUT-19-07 – Sludge Removal and Hauling at Water Plant

Dear Sir or Madam:

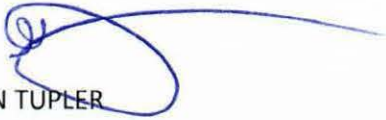

Austin Tupler Trucking, Inc. has been doing sludge removal contracts in Dade, Broward and Palm Beach Counties for over 30 years involving a dozen different municipalities and water plants including the City of Pembroke Pines Water Treatment Plant when Mike Ponce was in charge, finishing approximately 2013. At that time period when we did the City of Pembroke Pines Water Plant, the city was using a company that used a small drag line which was destroying each pond crumbling the side walls of the ponds. When we took over we brought in aggregate type materials to rebuild and stabilize each pond to the current situation now. Our expertise enabled you to save the City of Pembroke Pines a lot of money by rehabbing those ponds for very little cost.

We plan to use the same personnel and the same type of equipment that was used when we did your plant six plus years ago. We always ran it in a very productive operation with staff personnel who have ten plus years of experience doing this type of work. Prior to flipping the sludge from one pond to another, we come out in advance and go over the jobsite with the City of Pembroke Pines personnel whoever you elect them to be to go over the site conditions and access points and to make sure the material is ready to be flipped or removed. From our past experience from working on this particular plant and from working in other water plants, we have firsthand knowledge of the conditions and the type of materials and will go over this with the city personnel or representative prior to starting. Once we agree and your personnel agree, we bring in our equipment which is a full size excavator with an operator who specializes in this type of operation. After the material is flipped and it is ready to be hauled out, we book our trucks prior to starting a day or two before we bring experienced personnel in to supervise and make sure we have safe conditions and the material is dry enough so it doesn't leak or cause other issues. We continue hauling out the material every day unless weather conditions don't permit until we are done in a very efficient and productive manner usually in one or two days.

We keep a person onsite when dump trucks are involved to haul it out to ensure safety, prompt service, customer satisfaction and to resolve any complaints. Also, we have another person stop by on the job every day to make sure our employees, our truckers and our customer are satisfied. We constantly work on training with our personnel and only use experienced truckers with this operation that have done this type of work many times.

Every water plant is different and based on the situation we ran into from the previous contract, we will be making suggestion to the previous method to our current method in order to increase service satisfaction. If you can contact the previous personnel that ran this job when we were there, I believe that they were very happy with our company and our service.

Sincerely yours,

GLEN TUPLER
President

The 5% opacity limitation is consistent with this design and provides reasonable assurance that annual emissions of PM/PM₁₀ for all emission points in this emission unit system will be less than 133.83 TPY. This annual emission estimate is part of the facility-wide netting calculation to escape PSD applicability for PM/PM₁₀. Exceedance of the 5% opacity limit shall be deemed an exceedance of this permit condition and not necessarily an exceedance of the opacity limitations given in 40 CFR 63, Subpart LLL}

5.a. Calcium Carbonate Source: The permittee is hereby authorized to use CaCO_3 residuals ~~from the lagoons of the Miami-Dade County Water Treatment Plants~~ from any municipal potable water treatment plant as a raw material supplement in the clinker production process. ~~Use of CaCO_3 residuals from any other source shall require prior written approval from the RER.~~ The material shall be subject to analytical testing requirements for chloride and mercury content as determined by the RER. Results of such testing shall be maintained on file. [Permit No. 0250020-025-AC and Application No. 0250020-035-AC]

A.10. Calcium Carbonate Residuals Usage Records. For Pyroprocessing/Raw Mill System Kiln 5 (EU-028), Condition 18 of permit No. 0250020-025-AC is revised to reflect the removal of the limitation on the percentage of calcium carbonate residuals that may be used in the raw material feed.

MOTION TO AWARD PSUT-19-08 "LIME SLUDGE REMOVAL AND HAULING AT THE WATER PLANT" TO THE MOST RESPONSIVE/RESPONSIBLE BIDDER, AUSTIN TUPLER TRUCKING, INC., IN THE ANNUAL AMOUNT NOT TO EXCEED \$399,075.

SUMMARY EXPLANATION AND BACKGROUND:

1. On August 7, 2017, the City entered into an agreement with Westwind Contracting, Inc. for Waste Lime Sludge removal services for the City's Water Plant located at 7960 Johnson Street, Pembroke Pines, FL 33024.
2. The current contract with Westwind Contracting, Inc. is set to expire on September 30, 2020.
3. On May 10, 2019, West Wind Contracting contacted the City to inform that they would no longer be accepting lime sludge at their disposal site. Therefore, the City was forced to re-bid the services.

4. On June 19, 2019, the City Commission authorized the advertisement of PSUT-19-07 "Lime Sludge Removal and Hauling at the Water Plant", which was later advertised on June 25, 2019.

5. The purpose of this solicitation was too re-bid and to seek proposals from qualified firms to provide waste lime sludge transfer and removal services for the Utilities Division Water Plant located at 7960 Johnson Street, Pembroke Pines, FL 33024.

6. On July 23, 2019, the City opened (3) bids for PSUT-19-07. While tabulating the bids received, the Utilities Division noticed there was a calculation error in the bid document as advertised, and as a result, the Utilities Division together with the Procurement Department decided to reject all bids and re-advertise the project.

7. On July 25, the Utilities Division received the City Manager's approval to reject all bids for PSUT-19-07 "Lime Sludge Removal and Hauling at the Water Plant". Due to the impending expiration of the current agreement, the Utilities Division received the approval of the City Manager to rebid right away. On July 29, 2019, the project was re-advertised as PSUT-19-08 "Lime Sludge Removal and Hauling at the Water Plant".

8. On August 7, 2019, the City Commission ratified the City Manager's approval of the rejection of all bids for PSUT-19-07 and the re-advertisement of the solicitation as PSUT-19-08 "Lime Sludge Removal and Hauling at the Water Plant".

9. On August 13, 2019, the City opened four (4) proposals from the following vendors:

Vendor Name	Total Cost
Austin Tupler Trucking, Inc.	\$399,075
Prolime Corporation	\$803,625
Vapor Industries LLC	\$1,285,625
Vapor Industries LLC (alternate)	\$2,340,900

10. The Utilities Division has reviewed the proposals and has deemed Austin Tupler Trucking, Inc. to be the most responsive/responsible proposer.

11. In addition, Austin Tupler Trucking, Inc. has also completed the Equal Benefits Certification Form and has stated that the "Contractor currently complies with the requirements of this section."

12. Request Commission to award PSUT-19-08 "Lime Sludge Removal and Hauling at the Water Plant" to the most responsive/responsible bidder, Austin Tupler Trucking, Inc. in the annual amount not to exceed \$399,075.
